Annual Environmental Awareness and Sustainability Activities

Vivekananda World School is committed to promoting environmental consciousness and sustainable practices among students through year-round awareness programmes and experiential learning activities. In alignment with the principles of environmental stewardship and the Sustainable Development Goals (SDGs), the school regularly organises initiatives that encourage students to develop a lifelong commitment towards protecting and preserving nature.

On the occasion of World Earth Day 2025, students across different grades actively participated in tree plantation drives and environmental awareness activities. Students of Grades I and II enthusiastically took part in a plantation programme designed to introduce them to the importance of trees, biodiversity, and ecological conservation. Through this hands-on experience, students explored the natural environment, understood the significance of maintaining a clean and green ecosystem, and developed a sense of responsibility towards nature from an early age.

As part of the school's community outreach initiative, Grade VII students organised a Fruit Tree Plantation Drive at Basti Tanka Wali Road. The activity aimed to promote environmental sustainability while contributing to the well-being of the local community. The plantation of fruit-bearing trees highlighted the importance of increasing green cover, improving air quality, supporting biodiversity, and encouraging sustainable living practices. These initiatives provided students with valuable experiential learning opportunities, fostering environmental ethics, civic responsibility, teamwork, and active community participation. Through such programmes, Vivekananda World School continues to cultivate environmentally responsible citizens who are committed to creating a cleaner, healthier, and more sustainable future.
